

DUKE INFRARED PRODUCT HOLDING UNITS™

*Duke's Patented Infrared Technology Sets a New Milestone in the
Foodservice Industry for Holding Fried Food*

INCREASED HOLD TIMES

Product	Hold Time
Fried chicken pieces	30 minutes
Fried fish	30 minutes
Fried mozzarella sticks	45 minutes

Advanced Electronic Controls and Superior Food Quality

- Extends holding times while keeping the product hot and moist on the inside and crispy on the outside
- The infrared heating elements pulse on and off controlling the amount of “heat energy” applied to food, ensuring the ideal holding environment over the entire length of the product hold time
- Optimum and tailored product holding temperatures can be configured for each compartment resulting in a higher quality of food and longer holding times
- Fully programmable individual pan settings to support an array of fried foods
- Digital control of holding times and time decrement settings
- The infrared heating elements pulse on and off controlling the amount of “heat energy” applied to food
- Individual compartment eliminates flavor and odor transfer

Improves Serving Efficiencies

- The modular design can be configured to meet individual holding requirements
- Versatility to hold a broad range of fried foods in the same unit
- Does not require water for operation
- Easy to clean and operate
- Compatible with an Inventory Management System designed to provide consistent product quality all day long
