

## HOBART WATER TREATMENT SOLUTIONS

> Combi® Oven Water Care Package

A complete package designed to keep your operation flowing smoothly.

When you treat your equipment and water right, everything just flows.

> > > Water. It's your combi oven's best friend—and worst enemy. It's the reason behind that plump and juicy roasted chicken, the perfectly steamed vegetables and crispy fries, time and time again. And it's the cause for untimely service that can slow your equipment and cost your business.

But water, by itself, isn't the problem. Water quality and irregular preventive maintenance are the issues. Chlorine. Sediment. Hardness. All the chemicals and elements found in untreated water can hurt water-fed equipment, especially high-temperature equipment like your combi oven.

**Chloramines: There's an extra-corrosive element now on tap.** Chloramines are organic compounds made of 80 percent chlorine and 20 percent ammonia. Today many municipalities across the country are using chloramines, in addition to chlorine, to disinfect their water. When chloramines are heated, as they are in a combi oven, they are especially corrosive, causing stainless steel to pit, rust and turn gray.

Although water utilities have used chloramines for almost 90 years, more municipalities are using them now partly due to new drinking-water regulations developed to limit certain disinfection byproducts. How often, and when, chloramines are used varies from one community to the next. There is no set schedule for their usage. So you can't predict when your combi could come under the attack of chloramines.

> WS-55 Series Water Softener, featuring the NSF-Certified Hollow Carbon Filter to reduce chloramines.

**Introducing the WS-55 Water Softener Series, with complete chloramine removal.** Hobart's new WS-55 Series Compact Water Softener with the Hollow Carbon Filter System is the industry's only water treatment solution that provides soft water and is NSF-Certified to reduce harmful chloramines. It features a unique design with specially activated carbon. As water flows through the filter, it remains in contact with the filter material longer, removing the chloramines, chlorine, sediment, bad tastes and odors and other chemical byproducts. In addition, the system creates a virtually scale-free environment as a result of the softener combined system.

It's the one solution that does everything to treat your water right, so your operation can keep running at peak performance.

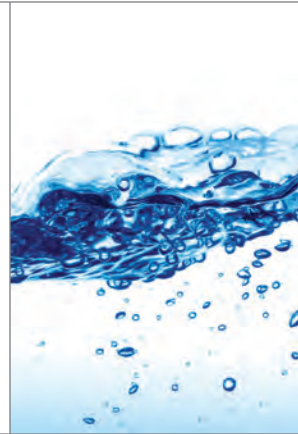

> For service issues, just add untreated water, and then heat. When chloramines, chlorine, hardness or other impurities found in untreated water mix with the heat from your combi oven, it makes for a huge service problem, not covered under warranty.

> Stop costly downtime before it happens with a Water Care Package.

> > >

Save money and save your equipment from the harmful effects of untreated water with a Combi Oven Water Care Package. Only Hobart Service can support you with cutting-edge water treatment solutions and comprehensive preventive maintenance to protect your combi oven and keep it in top form for years to come.

#### WATER CARE PACKAGES FOR COMBI OVENS – SAVE THOUSANDS

##### **WS-55E for Hobart Electric Combi Oven**

- Compact water softener and installation
- Hollow Carbon Filter System
- Three replacement cartridges
- Preventive maintenance for two years (1x/year)
- Replace cartridges and maintenance check for two years (1x/year)

##### **WS-55G for Hobart Gas Combi Oven**

- Compact water softener and installation
- Hollow Carbon Filter System
- Three replacement cartridges
- Preventive maintenance for two years (2x/year)
- Replace cartridges and maintenance check for two years (2x/year)

#### SERVICE CONTRACT RENEWAL PACKAGES

##### **Electric Combi Oven**

- Preventive maintenance (1x/year)
- Replacement cartridge and maintenance check
- Two replacement cartridges
- Equipment and parts cost

##### **Gas Combi Oven**

- Preventive maintenance (2x/year)
- Replacement cartridge and maintenance check
- Second maintenance check
- Two replacement cartridges
- Equipment and parts cost

*If you have multiple combi ovens in one location, additional water care packages are available.*

# the difference is clear

> **Hobart Service can test your water.** Let our factory-trained service representatives test your water on site for chloramines, chlorine, hardness, iron, pH and other harmful elements.

**Your #1 supporter.** Hobart, where equipment and service join together in support of you. Hobart makes a full line of equipment for the foodservice and food retail industries, including cooking, food machines, weigh wrap, warewashers and Traulsen refrigeration. We support our customers when and where it counts the most. In the field, at your place. With nearly 200 locations and 1,700 factory-trained service representatives across the country, we're always close by to install, maintain and service your equipment. If that's the kind of support network you've been looking for, contact your Hobart representative today by calling 888-4HOBART.
