

SCOTSMAN ICE SYSTEMS FOR HEALTHCARE
Give your patients the ice that gives back.

Scotsman[®]
Ice Systems

SCOTSMAN ICE SYSTEMS

Scotsman Ice Systems is committed to assisting healthcare facilities in providing the very best care for patients. That's why nugget ice helps promote higher patient satisfaction surveys by offering soft, chewable ice that people love.

BUT SCOTSMAN DOESN'T JUST GIVE THE BEST QUALITY CUBE, FLAKE AND NUGGET ICE TO PATIENTS. SCOTSMAN ALSO GIVES BACK TO THE FACILITIES THAT USE IT, IN THE FORM OF LOWER OVERALL OPERATING COSTS.

In addition, Scotsman gives back to the practice of healthcare as a whole—each Scotsman machine sold to a healthcare facility warrants a donation to the Global Water Challenge.

SCOTSMAN'S TOUCHFREE®
CUBELET, NUGGET AND FLAKE ICE MACHINES

help healthcare facilities provide the very best.

GIVE THE BEST TO YOUR PATIENTS

Scotsman offers a broad range of machines and ice forms for a variety of patient needs—from in-room service, cafeterias, physical therapy and even medical storage and transport.

In 1981, Scotsman revolutionized ice for healthcare with the invention of nugget ice—The Original Chewable Ice™. During periods where patients cannot consume liquids, nugget and flake ice provides an easily chewable way to quench their thirst without drinking water. And with the TouchFree dispenser design, patient safety and convenience are ensured.

The no-touch design protects the patient and healthcare workers by preventing cross-contamination. And all of Scotsman's TouchFree dispensers comply with National Sanitation Foundation standards and the Safe Drinking Water Act. And once liquids are allowed, nugget ice promotes hydration by making drinks more enjoyable for recovering patients.

GIVE BACK TO YOUR OPERATION

Scotsman strives to support healthcare facilities in new ways with each machine it produces by making ice machines that are more sustainable and versatile than ever.

In 2012, Scotsman was recognized by the EPA with the prestigious ENERGY STAR® Partner of the Year award, and in 2011 held the Award for Excellence in Energy-Efficient Product Design. With over 65 ENERGY STAR qualified models, Scotsman has the broadest offering of ice machines to fit any area or need in a healthcare facility—from emergency rooms to recovery centers, physical therapy to maternity.

Contributing to a low overall cost of ownership, Scotsman machines are built to last. Our enhanced dispensing drive system extends life and lowers maintenance costs. And the energy-efficient design consumes less in utility costs.

PRODIGY[®] ADVANCED SUSTAINABILITY[™]

In 2011, Scotsman introduced the next evolution of energy-efficient ice-maker technology. Prodigy Advanced Sustainability provides single-system ease for lower overall cost of ownership.

Prodigy machines are perfect for non-patient applications such as central dining, physical therapy and laboratories. Prodigy Advanced Sustainability features include:

- Choose the amount of ice when you want to make it, with the ultrasonic ice-level sensors. The seven-day 15 set-point system results in the ultimate level of natural resource efficiency.
- Advanced network control system provides information on performance history to maximize operational uptime. Service repairs can be accomplished faster and more effectively due to ability to self-diagnose an issue and benchmark it.
- Five LED-lighted symbols immediately alert staff to key operational issues to minimize performance interruptions and ensure appropriate ice production levels.
- Built-in antimicrobial protection with Scotsman AquaArmor[™], which uses AgION[®], a silver-based antimicrobial compound molded directly into key components to further defend against undesirable microbes, bacteria, mold and algae.

GIVE BACK TO THE COMMUNITY

Scotsman strives to do more good with every machine it sells. That's why it formed The Giving Ice Fund.

The Giving Ice Fund contributes a portion of each ice machine sold to a healthcare facility to the water and sanitation efforts of the Global Water Challenge.

By choosing Scotsman, healthcare facilities are investing in quality, sustainability and compassion.

ABOUT THE GWC

The Global Water Challenge seeks to accelerate the delivery of safe water and sanitation through partnerships that catalyze financial support and innovation for sustainable solutions.

Founded in 2006, Global Water Challenge (GWC) is a nonprofit 501(c)(3) coalition of leading organizations in the water and sanitation sector. Drawing upon the experience, expertise and assets of its members, GWC is able to create partnerships that achieve far greater results than any one organization could achieve by itself. REVOLUTIONIZING ICE MACHINES FOR OVER 60 YEARS.

Scotsman Ice Systems introduced a crystal-clear, mineral-free and slow-melting ice cube in 1950, which changed ice machines and beverages forever. And Scotsman has been on the cutting edge of ice machine innovation ever since. Scotsman offers not only the broadest line of ice machines but also the most energy efficient, with over 65 machines carrying the EPA ENERGY STAR® qualification. Our proven Prodigy system is the standard on which Scotsman has developed its latest and most efficient line ever: Prodigy Advanced Sustainability, which includes cube, flake and nugget ice machines. With a heritage of reliability and a vision of saving more water, energy and operating costs than ever before, Prodigy Advanced Sustainability shows how Scotsman continues to lead the way in ice machine innovation.

In 2012, Scotsman earned the ENERGY STAR Partner of the Year award. Offering more than 65 ENERGY STAR qualified models, Scotsman Prodigy ice machines incorporate superior designs that reduce energy and water consumption, making a difference for the environment and the bottom line.

No need to build your own BIM ice equipment files. Scotsman has done it for you. Our new collection of Revit® files can help you avoid costly mistakes and oversights. We have taken the guesswork out of specifying ice machines for your new build or renovation. That's why Revit by Scotsman offers a BIM file for every ice maker, bin, and ice and water dispenser we offer.

Our dedicated global sales and service network provides product availability and maintenance locally, when and where you need it. For technical assistance, call 1-800-533-6006.
