**FRESH FOOD ONDO-MAND:  
NEXT GENERATION TECHNOLOGY  
FOR ON-THE-GO EATING**

## MEET ONDO

ONDO is a temperature-controlled locker system for efficient food pickup and delivery. The unit offers operations a safe food delivery system with lockers that are easily converted to hot or cold through our innovative patent-pending technology. The addition of optional motorized, touchless doors makes the ONDO unit a truly hand-free experience.

## EXPERIENCE THE ONDO FOOD LOCKER SOLUTION

- Top-quality metal construction with powder coat, stainless, or custom vinyl exterior
- Units are built as individual compartments, self contained
  - Unique patent pending design for convertible hot or cold application allows the operator to adjust each compartment from 38 degrees for cold, to 145 degrees for hot
  - Compartments can also be split, for a hot side and a cold side; either vertically or horizontally
- Offered as freestanding or counter-top models
- Wall style front access or rear loading for pass-thru application
- Front doors operate with spring loaded hinged doors or optional motorized top hinged doors for a touchless solution
- Doors can be solid or glass vision panel
- Completely expandable by the addition of columns as needed
- Hardware and Software Support
- Designed to operate as a standalone solution or completely integrated into the existing process and operation

**HOT, COLD,  
PRECISION,  
CONTROL**

## CONFIGURATION OPTIONS

- Locker sizing:  
**8"X12" · 12"X12" · 12"X16"**
- Built by column to allow unlimited configuration options
- Additional columns can be added post-installation and "Go Live"
- Locker size can vary by column
- Mix ambient and temperature controlled seamlessly
- Embedded technology package or dedicated tower

## CUSTOMER FLOW

Place an order on the operation's existing app or website

When your meal is ready, a PIN or QR Code is texted directly to you

After you arrive, either scan your QR code or type in your 4-digit PIN

The screen will indicate which cube your meal is in & the corresponding door opens

## EMPLOYEE FLOW

Order is placed & sent to kitchen to be made using current existing processes

An employee arrives at the user interface & types in their runner code

The employee selects an available locker

Typing in the order ID & customer's phone number, they load the food in locker
