Serving Lines

At Duke we understand the needs of a foodservice operation. With more than 90 years of experience and 10,000 counters and counting - we are experts at designing affordable solutions that meet your needs and fit your space. Whether it's a traditional serving line, stand-alone kiosks, or a custom configured line with themed signage, let Duke help you build a profitable equipment program around the finest, most stylish counters in the industry. Our comprehensive lineup includes:

AeroServ™

With our **AeroServ™** line of modular counters, affordable doesn't mean limited. Our 24.5" wide stainless steel tops are great for remodel areas where space is limited without compromising on flexibility or durability. In addition, the narrow body makes it easy to serve product over the foodshields.

Thurmaduke™

Thurmaduke™ is our premium line of traditional modular serving systems that are designed to help you maximize efficiency, reduce labor and increase productivity. Depending on how you serve your product or what food challenge you have, Duke has a serving line that can be customized specifically for your needs.

Expressions™

Our **Expressions™** line of modular custom counters offers all the distinctive design options of custom serving lines with the added benefit of modular efficiencies. Create an atmosphere of excitement that increases participation and raises your a la carte purchases. While Expressions is engineered for functionality, its truly distinctive high-end look and feel will set your foodservice operation apart.

Insignia™

The **Insignia™** custom product line offers truly distinctive design options with impressive one-of-a-kind options with any style or theme! Custom angle iron construction and sophisticated decor delivers unique character to your design and unique requirements ensuring increased participation. Take advantage of Duke's scale, manufacturing efficiencies and complementary product lines to build a genuinely remarkable, yet cost effective, serving solution.
